# SITUATION SUMMARY

## Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Level 1	Level 1	Level 1

### State Activation Level Change

**Effective Thursday, 11/30/17, the State Operations Center will transition to a new activation level sequence.**

In accordance with the 2017 edition of the State of California Emergency Plan (SEP) published on 10/01/17, Cal OES is changing our State Activation Level sequence to align with the Federal Emergency Management Agency (FEMA) and many of our local partners. The new Activation Levels apply to the State Operation Center and the Inland, Coastal and Southern Regional Operations Centers.

Activation Level	Conditions / Definition
Level 1	<ul style="list-style-type: none"><li>Catastrophic disaster, which requires comprehensive state-level response and/or assistance</li></ul>
Level 2	<ul style="list-style-type: none"><li>Large-scale disaster, requiring high amount of state involvement</li></ul>
Level 3	<ul style="list-style-type: none"><li>Small to Moderate Disaster/Pre-Planned Event</li></ul>
Normal Operations/Monitoring	<ul style="list-style-type: none"><li>Duty Officer Status</li><li>Steady-state operations</li><li>Warning Center maintains situational awareness</li></ul>

# **SITUATION SUMMARY**

## **Cal OES EMAC Missions**

**2017-SOC-43430:** Cal OES Individual Assistance (IA) Branch requested two (2) IA Coordinators in support of the 2017 October Statewide Fire Recovery efforts.

- Two (2) IA Coordinators from the State of Washington will provide support in a Joint Field Office, Local Assistance Center, or in the field as needed.
- Both IA Coordinators are scheduled to provide support from 11/27/17 – 12/23/17.

# WEATHER OF CONCERN

## Weather of Concern

- There is no weather of concern.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

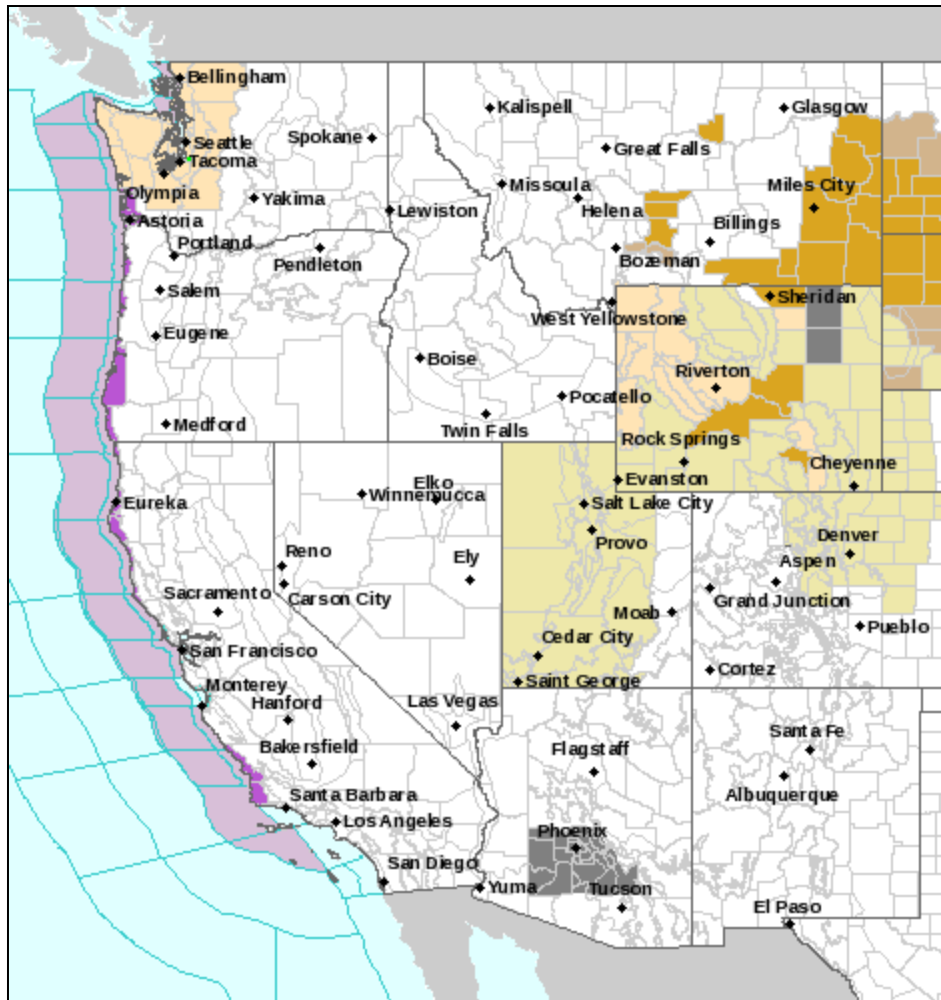

A near zonal, drier flow will affect the region today through Friday. Temperatures will be near to a little above normal. Wind speeds will generally be on the lighter side except localized gusty N to NE winds this morning to early afternoon across the Sacramento Valley and adjacent foothills found along the eastern edge of the valley. Peak gusts to 30 mph will occur then. The near zonal flow will break down and give way to a Pacific low diving in from the north during the weekend. Precipitation chances and amounts are trending lower with this system. The models have fluctuated widely on the path of the low so confidence in the impacts is low to moderate at this time. The potential for drier, gusty N to NE winds exists behind the system passage early next week.

## **SOUTHERN CALIFORNIA**

There will be little change in the weather through Friday as a weak ridge of high pressure sits over the region. Maximum temperatures will be 5 to 10 degrees above normal, with 50s to low 60s across the mountains, 60s to low 70s in the Central California Valleys, and 70s to low 80s in the Southern California Valleys. Minimum humidity will be above 15% across most of the region. Winds will be light through Friday. A weak Pacific trough will cool temperatures down to near normal and bring a little higher humidity to the region this weekend. West winds of 15 to 25 mph with gusts to 40 mph will surface across the wind prone mountain and desert locations Saturday afternoon through Sunday evening. Another ridge of high pressure will build into the West Coast from the Pacific Ocean bringing a warming and drying trend to the area Monday through the end of next week. Offshore flow is likely to take place next week, but the strength and duration are in question.
